Corey:

I made minor changes to the table. For field caulk, treat two pieces for each case. Use the second piece as backup. If you can take the slices from one piece, it is fine.

Subject: NASA Test Matrix v1.6

I have expanded the test matrix based on our meeting yesterday afternoon. The primary changes are: duplicate extraction samples; the addition of a duplicate inactive sample (per media); the addition of an extra piece of caulk in NASA-12 and NASA-15.

Thoughts? Questions? Comments?
